Facility Capabilities

HF – ARES, Shares, MARS, RACES

Facility Capabilities

HF Peripherals and UHF, VHF, FRS, GMRS

The screenshot displays a Windows desktop environment with several software applications open. The primary application is the WAIS Controller, which is used for managing radio frequencies and site lists. It features a 'SITE LIST' on the left and a 'DISPATCH' panel on the right. The dispatch panel shows a list of radio channels, including various police and fire dispatch channels, with status indicators for each. Other windows include Tuner Geni, which shows radio tuning parameters like PWR, SWR, and PTT; PowerGeniusXL, which displays power and SWR levels; and AntennaGeniu, which shows a globe and antenna settings. The system tray at the bottom indicates the time as 6:08 PM on 5/21/2023.
